Francisco Javier Hidalgo Ruiz

Senior Backend Developer & AI Engineer

Granada, Spain · franjhr@gmail.com · +34 647 519 804 · linkedin.com/in/franjhr

PROFESSIONAL SUMMARY

Software engineer with 15+ years of experience in web development, specialized in Ruby on Rails. Senior Backend Developer with experience on an HR management SaaS platform (ATS), combining development, feature design, code review, and mentoring while coordinating the application's support and maintenance team. Actively integrates AI tools into the development workflow to improve delivery quality and speed. Currently enrolled in the AI Engineer Master's programme at thePower Tech School.

PROFESSIONAL EXPERIENCE

Senior Backend Developer — Bizneo HR Solutions

Jul 2017 — Sep 2026

- Backend development in Ruby on Rails for an ATS (applicant tracking system); feature design, code review, and mentoring within a team of 10 developers.
- Coordination of the application's support and maintenance team.
- Stack: Ruby on Rails, PostgreSQL, Elasticsearch, Sidekiq/Redis, Docker, AWS (Bedrock), automated testing and CI, HTML/CSS, JavaScript, React.

ARTIFICIAL INTELLIGENCE

- **Amazon Bedrock** — generative AI integration in production: a RAG (Retrieval-Augmented Generation) system powering a conversational chatbot for candidate screening, plus candidate matching, content generation, and automatic CV summarization.
- **Claude Code** — generative AI adopted in the daily development workflow, speeding up feature design, code review, and issue resolution.

Analyst | Senior Developer — NGA Human Resources

Sep 2015 — Jul 2017

- Analysis and development of web applications with Ruby on Rails, MySQL, JavaScript, HTML, CSS.

Analyst | Developer — Razorfish | Healthware — Oct 2012 – Sep 2015

- Development of web applications using TDD (Ruby on Rails, MySQL, HTML+CSS, JavaScript) for clients including Axa and Médicos del Mundo.
- Development of health-focused iOS and Android mobile apps (bipolar disorder and type 1/2 diabetes tracking).

Analyst | Developer — Nuatt (Publicis Healthcare Communications Group) — Mar 2012 – Oct 2012

- Development of web applications using TDD (Ruby on Rails, MySQL, HTML+CSS, JavaScript).

Technical Department Coordinator — Virtual Solutions & Artificial Intelligence S.L.

May 2009 – Dec 2011

- Coordination of the technical department; design and development of web portals (Python, Django, JSP) for clients including the University of Granada, including the R&D&I projects INTERFAQ (Junta de Andalucía) and Plan Avanza Competitividad (epidemiological surveillance system).

PERSONAL PROJECTS

Mykitker · mykitker.com — Oct 2026 – present

Platform that lets content creators build their media kit by connecting their Instagram account. Live and under active development; open Instagram access is under Meta review.

- Designed, built and deployed solo, with Claude Code in the development workflow.
- Django and PostgreSQL backend, HTMX interface, OAuth integration with the Instagram API and background metrics sync.
- Self-managed infrastructure: Docker on a VPS, Caddy, Cloudflare, CI with GitHub Actions and encrypted backups with tested restores.

Tidewiki — Sept 2026 – present

Ruby tool that uses AI to generate a repository's wiki and update it with every commit, only where the code changed. In development; first public release in preparation. Real example: github.com/tidewiki-demos/itsdangerous.

- Incremental updates proposed through a pull request, with a per-run cost limit and manual edits preserved.
- Configurable model (Claude, OpenAI, Bedrock, Ollama...), with code references checked against the repository and secrets redacted before anything is sent to the model.

EDUCATION

AI Engineer Master's Program

thePower Tech School · Oct 2026 — in progress

RAG, agents, fine-tuning (LoRA/QLoRA), MLOps (MLflow), LLM observability (LangFuse/LangSmith), and deployment on AWS (Bedrock + Lambda).

Computer Engineering (BSc/MSc equivalent)

University of Granada · 2007–2009

Final project: web platform for sports club management (Python/Django) — Highest Honors.

Technical Engineering in Computer Systems

University of Granada · 2003–2007

Teaching Certificate (CAP)

University of Granada · 2009

TECHNICAL SKILLS

LANGUAGES & FRAMEWORKS

Ruby on Rails · JavaScript · React · HTML5 / CSS3

DATA & INFRASTRUCTURE

AWS · PostgreSQL · Elasticsearch · Redis / Sidekiq · Docker

METHODOLOGY & QUALITY

TDD · Automated testing · Continuous Integration (CI) · Git · Code review

TECHNICAL LEADERSHIP

Mentoring · Feature design · Team coordination

LANGUAGES

Spanish	English
Native	Intermediate (B1)

In progress: EasyPeasyFluent, 5 classes/week focused on speaking (until Aug 2027)

Goal: C1 with IELTS certification
